EXPERIENCE

Technical Writer II

Mar. 2025 – Present

Cloudflare, Inc. | San Francisco, CA

- Led documentation for the Application Security: Threat Detection platform, a product suite encompassing bot detection, scraping, interactive challenges, and API security, creating over 50 new feature pages and refining over 30 existing articles to align users to content relevant to their current state.
- Collaborate closely in an agile and AI-first environment with product managers, systems and solutions engineers, content designers, and technical and customer support experts across 10 product teams to publish, update, and review internal and customer-facing feature documentation and blog posts.
- Conduct user research and track metrics to address content gaps and integrate data results into documentation, increasing pageviews by 107% and averaging 2,500 unique visitors per day.
- Implement video tutorials in the documentation and the dashboard, reducing open support tickets and increasing product sentiment by 25%.

Technical Writer I

Apr. 2022 – Mar. 2025

Cloudflare, Inc. | San Francisco, CA

- Maintain ownership over application services product line documents, instructional guides, and API documentation.
- Collaborate with technical experts and product managers to distill complex product concepts into clear and accurate documentation, utilizing authoring and publication tools such as Visual Studio Code and GitHub.
- Review and edit product documentation, knowledge base articles, and feature blog posts according to company guidelines.
- Oversee external documentation contributions from application security product users, addressing and resolving over 100 open issues year-over-year.

Technical Writing Intern

Aug. 2021 – Dec. 2021

National Aeronautics and Space Administration (NASA) | Washington, D.C.

- Collect and organize information required for the preparation of interface control documents for project and portfolio management systems.
- Collaborate with systems architects and engineers for the composition of documentation for the software integration framework.
- Contribute documentation abilities to the reorganization management plan for the Chief Information Officer.
- Work with Quality Management teams to transition materials to digital presence.

Technical Writing Intern

June 2021 – Aug. 2021

Tesla, Inc. | Palo Alto, CA

- Compose and publish DITA-structured product installation manuals for end-users in Europe, Africa, and the Asia-Pacific region using XML authoring tools such as Oxygen and Publication Manager.
- Conduct usability testing for the Powerwall product line documentation and implement suggestions for improvement.
- Collaborate with senior technical writers, engineers, and stakeholders for documentation of installation guides.
- Manage Energy Operations pages and resources via content management systems.

EDUCATION

California State University, Long Beach | Bachelor of Arts in English

- Dual concentration degree in Rhetoric & Composition and Creative Writing
- Certificate in Professional & Technical Writing

GPA: 3.9/4.0

PROJECTS

Product Content Experience Summer Internship Program

Jan. 2023 - Present

- Established the technical writing internship program, collaborating with 3 product teams to create capstone projects, vetting candidates from an applicant pool of 600 students, participating in interview panels, and providing mentorship advice and reviews to help publish over 20 tutorials across 3 months.
