EXPERIENCE

Technical Writer II

Mar. 2025 – May 2026

Cloudflare, Inc. | San Francisco, CA

- Own the documentation strategy for Application Security: Threat Detection, a platform spanning bot detection, scraping defense, interactive challenges, and API security. Created 50+ new feature pages and restructured 30+ existing articles to surface content based on user state and product context.
- Drive content alignment across 10 product teams in an agile, AI-first environment, partnering with product managers, systems engineers, solutions engineers, content designers, and support staff to publish and maintain customer-facing documentation and blog posts.
- Conduct user research and analyze content performance data to identify gaps. Increased documentation pageviews by 107%, averaging 2,500 unique visitors per day.
- Designed and shipped video tutorials embedded in documentation and the product dashboard, reducing open support tickets and improving product sentiment by 25%.

Technical Writer I

Apr. 2022 – Mar. 2025

Cloudflare, Inc. | San Francisco, CA

- Owned end-to-end documentation for the application services product line, making editorial and structural decisions across the full content lifecycle.
- Translated complex product and system concepts into clear, accurate documentation in collaboration with engineers and product managers, using VS Code and GitHub as primary authoring and publication tools.
- Enforced documentation quality standards across product docs, knowledge base articles, and feature blog posts through editorial review.
- Managed external documentation contributions from the application security user community, triaging and resolving 100+ open issues per year.

Technical Writing Intern

Aug. 2021 – Dec. 2021

National Aeronautics and Space Administration (NASA) | Washington, D.C.

- Prepared interface control documents for project and portfolio management systems in coordination with systems architects and software engineers.
- Contributed to the CIO reorganization management plan and partnered with Quality Management teams to move reference materials to a digital format.

Technical Writing Intern

June 2021 – Aug. 2021

Tesla, Inc. | Palo Alto, CA

- Authored DITA-structured product installation manuals for Powerwall end-users across Europe, Africa, and Asia-Pacific using Oxygen XML and Publication Manager.
- Conducted usability testing on Powerwall documentation and implemented improvements based on findings.

EDUCATION

California State University, Long Beach | Bachelor of Arts in English

- Dual concentration degree in Rhetoric & Composition and Creative Writing
- Certificate in Professional & Technical Writing

GPA: 3.9/4.0

PROJECTS

Product Content Experience Summer Internship Program

Jan. 2023 - Present

- Established the technical writing internship program, collaborating with 3 product teams to create capstone projects, vetting candidates from an applicant pool of 600 students, participating in interview panels, and providing mentorship advice and reviews to help publish over 20 tutorials across 3 months.
