EXPERIENCE

Technical Writer

Cloudflare, Inc. | San Francisco, CA | 04/2022 – 05/2026

- Grew documentation pageviews by 110% to an average of 4,500 unique daily visitors by owning end-to-end documentation strategy for Application Security: Threat Detection products, driving user research, analyzing performance data, and single-handedly creating 70+ new feature pages and restructuring 50+ existing articles to surface content based on user state and product context.
- Reduced open support tickets and improved product sentiment by 25% by conceiving and leading an embedded video tutorial initiative from concept to launch, directing collaboration between the video production and product management teams, defining the content strategy, and translating complex product and system concepts into clear, accurate documentation.
- Directed content strategy across 10 product teams in an agile, AI-first environment by setting editorial direction and publishing standards for user interface copy, customer-facing developer documentation, knowledge base articles, and feature blog posts, while partnering with product managers, systems engineers, solutions engineers, content designers, and support staff to execute.
- Owned documentation quality and community responsiveness across the full content lifecycle by establishing docs-as-code workflows, enforcing editorial style guide standards, making end-to-end structural decisions, and resolving 100+ open issues per year through structured triage of external contributions from the customer community.

Technical Writing Intern

National Aeronautics and Space Administration (NASA) | Washington, D.C. | 08/2021 – 12/2021

- Produced 5 interface control documents for meeting room systems through hands-on system testing and IT staff interviews to ensure technical accuracy for federal employees.
- Accelerated NASA CIO reorganization timelines by contributing to the management plan and partnering with Quality Management to migrate reference materials from physical to digital formats.

Technical Writing Intern

Tesla, Inc. | Palo Alto, CA | 06/2021 – 08/2021

- Reduced field support contacts and improved usability for Powerwall installation manuals across Europe, Africa, and Asia-Pacific by authoring DITA-structured documentation, conducting structured usability testing, and interviewing 3 field experts whose feedback surfaced accuracy gaps, enabling on-site teams to self-serve documentation while resolving install issues independently.

PROJECTS

Product Content Experience Summer Internship Program

- Launched and scaled a technical writing internship program, resulting in 20+ published tutorials across 3 months by collaborating with 3 product teams to design capstone projects, screening 600+ applicants, leading interview panels, and providing hands-on mentorship and editorial feedback.

Internal AI Prompt Library

- Accelerated AI adoption among non-technical staff by building an internal prompt library of 20+ ready-to-use prompts spanning use cases from developer-focused documentation pages to email response templates to equip teams with practical starting points to streamline their workflows without prior AI experience.

SKILLS

Languages & Markup: Markdown, YAML, HTML/CSS, DITA XML

Docs-as-Code & Version Control: Git, GitHub/GitLab, CI/CD pipelines, Hugo, Astro

Authoring & Editing Tools: Visual Studio Code, Oxygen Authoring Tool, Windsurf, OpenCode
